

Time to take your lungs for an MOT?

The new NHS Lung Health Check service for people aged 55-74 in Wakefield

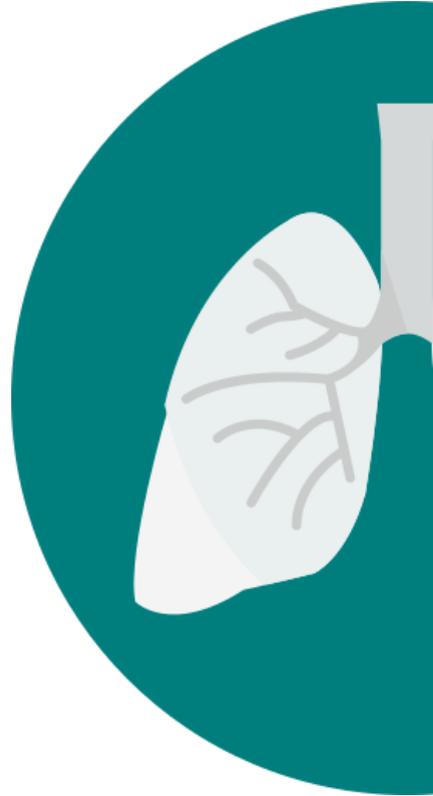

Lung Health Checks

The MOT for your lungs

Your GP practice now offers free NHS Lung Health Check to people aged 55-74 who smoke or used to smoke.

Run by specially trained nurses, they are an easy way to find out how well your lungs are working. If needed, you will get care and treatment to help breathe new life into your lungs.

Your practice invites you for a lung check even if you're feeling fine and whether or not you have any lung problems already.

Benefits of a Lung Health Check

- It's free
- It's local and easy to get to
- Time to talk through your questions or concerns
- No judgements on smoking
- Find out about having a lung scan if you need one.

30 minutes is all it takes

A lung health check can help spot any problems early - often before you even notice anything is wrong.

If a problem with your lungs is found early, treatment could be simpler and more successful.

Your lungs work hard every minute of your life. As you get older, it's worth having them checked out.

How to book an appointment

Lung Health Checks are currently being offered to eligible patients at selected practices across Wakefield.

Look out for your invitation in the post or call your practice for more details.
